EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

Allowable Subject Matter

1. Claims 1-3, 5-7, 15-18, 20-23 and 25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant's inventions of claims 1 and 15 include the subject matter of a high-frequency filter arranged to attenuate a spurious high-frequency signal, a high-frequency switch arranged to switch a transmission signal and a reception signals, wherein the high-frequency switch attenuates the third harmonic of the reception signal and a receiver-side balun arranged to convert an unbalanced signal into a balanced signal, wherein the receiver-side balun attenuates the second harmonic of the reception signal. The examiner has found the applicant's arguments in pages 8 and 9 of the amendment filed 3/15/2005 persuasive. Further, no prior art as been discovered that anticipates the applicant's claims 1 and 15. However, prior art has been discovered that individually discloses portions of the applicant's claims 1 and 15 (see the previous office actions). Nevertheless, the applicant's combination of subject mater would not be obvious from the prior art as there is no motivation to combine the prior art to include all of the subject matter found in claims 1 and 15. Therefore, the applicant's inventions of claims 1 and 15, when considered in their entirety, comprise a unique combination of subject matter that is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
